ABOUT THE POSITION
Applications are invited for a full-time Assistant Member (equivalent to Assistant Professor) of Epidemiology position in the Center for Outcomes Research (COR) at JPS Health Network. The COR is a collaborative group of epidemiologists and biostatisticians involved in outcomes research. Topical areas of interest include cancer, HIV, hepatitis C virus, and maternal and perinatal outcomes, particularly among socioeconomically disadvantaged populations.

This institutionally-funded faculty position offers a unique opportunity to pursue research for an understudied population that faces considerable health inequities. In addition to extensive opportunities for primary data collection, available sources for secondary data analysis include an institutional cancer registry; longitudinal cohorts for assessing outcomes of hepatitis C virus, HIV, and pregnancy; and extensive electronic medical records. The Assistant Member position is expected to develop an independent research program, generate publications, and obtain external funding as needed.

ABOUT THE INSTITUTION
JPS Health Network is an urban, public healthcare system in Fort Worth, TX that has supported healthier lives for more than a century. The health network comprises a 573-bed academic hospital and more than 40 satellite and school-based health centers. The network’s more than 6,500 team members deliver high-quality and compassionate care for more than 1.2 million patient encounters annually.

HOW TO APPLY
Applicants are required to have doctoral training (PhD, DrPH, ScD) in epidemiology or a related field. Applications will be reviewed on a rolling basis. The start date is negotiable. Please submit a cover letter summarizing research interests and a curriculum vitae through our online application system.
