Prescription Drug Overdose: Prevention for States

The West Virginia Prevention for States project has three aims: to enhance the prescription drug monitoring program, to implement and evaluate an insurer mechanism to reduce problematic prescribing of opioids, and to evaluate the implementation and impact of Senate Bills 335, 437, and 523, bills aimed at legislating policies to decrease the incidence of fatal drug overdose in the state. The evaluation team will evaluate the implementation and impact of enhancements to the PDMP and the insurer mechanism as well as conduct the policy analysis.
