Dr. Classen is an internationally funded prevention-oriented rehabilitation scientist who studies fitness-to-drive issues in at-risk drivers using clinical assessments, driving simulators, on-road assessments, in-vehicle technologies and automated vehicles. Her scholarly work utilizes both a public health and a rehabilitation science approach to bring depth and breadth in understanding driving from multiple perspectives. Since her academic career started in 2002, she has received competitive external funding (totaling ~\$6 million) from U.S. agencies (e.g., National Institutes of Health, Centers for Disease Control and Prevention, Department of Defense, Department of Transportation, industry and other organizations) as well as agencies in Canada and abroad. She has (co)authored over 130 peer-reviewed publications, book chapters, and special journal issues; she is the editor of a handbook on driving simulation (AOTA Press, 2017); and she has presented over 200 papers at scientific conferences. Dr. Classen is Editor-in-Chief of the Occupational Therapy Journal of Research, serves on various (inter)national committees related to driving, is a Fellow of the American Occupational Therapy Association and the Gerontological Society of America, and an inductee to the American Occupational Therapy Foundation's Academy of Research which is the highest scholarly honor that the Foundation confers upon scholars. College of Public Health and Health Professions

As a member of the **Executive Leadership Committee of PPHP** I participate in critical decision making related to College affairs. A recent accomplishment pertains to the re-engineering and re-envisioning of the **Disability Concentration in the PhD program in Rehabilitation Science**. Under my leadership, and based on the work of a committee that I have formed, we have designated a new name for this concentration and totally restructured the curriculum to ensure its relevance and currency. The PhD RSD Steering committee has accepted our “re-envisioning tasks” and next steps are in progress to get this concentration officiated through the university curriculum committee.

University of Florida

I am a firm believer in shared governance and as such, I am “running” for a position in the **Faculty Senate** to serve a three-year term, commencing the first day of the fall term 2018. Outcomes of this election will be known in May, 2018.

Profession of Occupational Therapy

1. **Editor-in-Chief Occupational Therapy Journal of Research (OTJR)**. I have served as EIC since Jan 2015. As per the Publishers report (April 2018), the journal has almost doubled its impact number (.462 in 2014 to .81 in 2018), increased manuscript submission 10-fold, demonstrated a more rigorous acceptance ratio (41% in 2015 to 30% in 2018), decreased the average review speed despite the growth in number of submissions (from 65 days in 2015 to 60 days in 2018), decreased the average days from final decision to publication (from 37 days in 2015 to 23 days 2018). The journal also showed an increase in total renewal rate of 106% (individuals 53%, members 115%, institutions 94%, and developing world 106) and quadrupled the size of its editorial board. I have accepted another 3-year term as EIC of OTJR which will span from 2018-2021.
2. In my capacity as EIC of OTJR, I also serve as an ad-hoc member on the **American Occupational Therapy Foundation Scientific Council** and the **American Occupational Therapy Foundation Scientific Advisory Board**. Via these memberships I contribute to shaping and influencing the scientific and research agenda of the profession of Occupational Therapy.
